

Welcome to the program!

Configuration

To launch the configuration tool, you have to choose one of options below:

- click **InfoTouch Configurator** icon on the desktop
- when the main program runs, you should click the **Settings** icon on the top right or press the defined hotkey (defaults: **Shift + Alt + C**)

Note: If the access to the program is protected with a password, a login prompt will appear.

Password

By default the access to the program settings has been protected with a password. The default password is **infotouch**.

You can use the configuration tool to change login credentials. We recommend to change the password!

Exit

To exit the main program, you have to press the defined hotkey (defaults: **Shift + Alt + X**). You can use the configuration tool to define your own hotkey.

Note: If InfoTouch works in kiosk mode, and you want to exit the main program, you should first change InfoTouch kiosk mode to Windows shell.

Export/Import

To export and import the application settings, you should put all files (eg. images, documents) in the subdirectory user located in the directory where InfoTouch Software was installed. The application is installed by default in

C:\Users\YourUserName\AppData\Local\InfoTouch\InfoTouch Professional (example path for InfoTouch Professional).

Note: You can click the **User folder** icon on the top toolbar and put the files in this folder.

Help

To get access to InfoTouch user's manual you should:

- run the configuration tool
 - select the **Help** tab in the top toolbar
 - click the **Help** icon
-
